# CLINICAL POLICY Pertuzumab

# **Clinical Policy: Pertuzumab (Perjeta)**

Reference Number: PA.CP.PHAR.227

Effective Date: 01/2018 Last Review Date: 04/2024

#### **Description**

Pertuzumab (Perjeta<sup>®</sup>) is a human epidermal growth factor receptor 2 protein (HER2)/neu receptor antagonist.

#### FDA Approved Indication(s)

Perjeta is indicated for:

- Use in combination with trastuzumab and docetaxel for the treatment of patients with HER2-positive metastatic breast cancer (MBC) who have not received prior anti-HER2 therapy or chemotherapy for metastatic disease.
- Use in combination with trastuzumab and chemotherapy as:
  - Neoadjuvant treatment of patients with HER2-positive, locally advanced, inflammatory, or early stage breast cancer (either greater than 2 cm in diameter or node positive) as part of a complete treatment regimen for early breast cancer;
  - Adjuvant treatment of patients with HER2-positive early breast cancer at high risk of recurrence.

### Policy/Criteria

It is the policy of PA Health & Wellness ® that Perjeta is **medically necessary** when the following criteria are met:

#### I. Initial Approval Criteria

- **A. Breast Cancer** (must meet all):
  - 1. Diagnosis of HER2-positive breast cancer;
  - 2. Prescribed by or in consultation with an oncologist;
  - 3. Age  $\geq$  18 years;
  - 4. Prescribed in combination with trastuzumab\* and one of the following (a, b or c):
    - a. With trastuzumab only;
    - b. With taxane-containing chemotherapy (e.g. docetaxel or paclitaxel);
    - c. Chemotherapy as neoadjuvant or adjuvant treatment (see Appendix B);
    - \*Prior authorization may be required
  - 5. Request meets one of the following (a, or b):
    - a. Initial dose: 840 mg, followed by maintenance dose: 420 mg every 3 weeks;
    - b. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

#### **Approval duration: 6 months**

#### **B.** Additional NCCN Recommended Uses (off-label) (must meet all):

- 1. Diagnosis of one of the following (a, b, c or d):
  - a. Recurrent HER2-positive salivary gland tumor;

# **CLINICAL POLICY**

#### Pertuzumab

- b. Unresectable or resected gross residual (R2) disease, or metastatic HER2-positive gallbladder cancer or cholangiocarcinoma;
- c. Colorectal cancer and disease is all of the following (i, ii, and iii):
  - i. HER2 positive;
  - ii. Wild-type *RAS* (defined as wild-type in both KRAS and NRAS [i.e., KRAS and NRAS mutation-negative] as determined by an FDA-approved test for this use);
  - iii. Wild-type *BRAF* (i.e., BRAF mutation-negative);
- d. Meets conditions of other NCCN category 1, 2A, or 2B recommendation;
- 2. Prescribed by or in consultation with an oncologist;
- 3. Age  $\geq$  18 years;
- 4. Prescribed in combination with trastuzumab;\* \**Prior authorization may be required.*
- 5. Dose is within FDA maximum limit for any FDA-approved indication or is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (prescriber must submit supporting evidence).

**Approval duration: 6 months** 

C. Other diagnoses/indications: Refer to PA.CP.PMN.53

#### **II. Continued Approval**

- A. All Indications in Section I (must meet all):
  - 1. Currently receiving medication via PA Health & Wellness benefit or member has previously met all initial approval criteria; or the Continuity of Care policy (PA.LTSS.PHAR.01) applies;
  - 2. Documentation of positive response to therapy;
  - 3. If request is for a dose increase, request meets one of the following (a or b):
    - a. New dose does not exceed 420 mg every 3 weeks;
    - b. New dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

#### **Approval duration: 12 months**

(Up to 18 total cycles if neoadjuvant or adjuvant therapy)

#### **B.** Other diagnoses/indications (1 or 2):

1. Currently receiving medication via PA Health & Wellness benefit and documentation supports positive response to therapy; or the Continuity of Care policy (PA.LTSS.PHAR.01) applies;

#### Approval duration: Duration of request or 6 months (whichever is less); or

2. Refer to PA.CP.PMN.53

## III. Appendices/General Information

Appendix A: Abbreviation/Acronym Key

BRAF: v-raf murine sarcoma viral

oncogene homolog B1

FDA: Food and Drug Administration

HER2: human epidermal growth factor

receptor 2

KRAS: Kirsten rat sarcoma 2 viral oncogene homologue

# CLINICAL POLICY Pertuzumab

MBC: metastatic breast cancer

NRAS: neuroblastoma RAS viral oncogene homologue

# Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent and may require prior authorization.

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
Examples of drugs that may be used with Perjeta for breast cancer:  • Chemotherapeutic agents: carboplatin, cyclophosphamide, doxocrubicin, docetaxel, paclitaxel  • HER2-targeted agents: trastuzumab (Herceptin®, Kadcyla), lapatinib (Tykerb), Nerlynx® (neratinib)  • Endocrine therapy: tamoxifen; aromatase inhibitors: anastrozole (Arimidex®), letrozole (Femara®), exemestane (Aromasin®).	Regimens are dependent on a variety of factors including menopausal status, treatment/progression history, clinical stage, histology, mutational and receptor status, treatment purpose (e.g., adjuvant and neoadjuvant treatment, treatment for metastatic disease).	Varies

Therapeutic alternatives are listed as Brand name® (generic) when the drug is available by brand name only and generic (Brand name®) when the drug is available by both brand and generic.

# Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): Known hypersensitivity to pertuzumab or to any of its excipients
- Boxed warning(s): Left ventricular dysfunction, embryo-fetal toxicity

### Appendix D: General Information

• Residual Tumor (R) Classification:

R0	no residual tumor	resected, negative margin
R1	microscopic residual tumor	resected, positive margin
R2	macroscopic residual tumor	resected, gross residual disease

## IV. Dosage and Administration

Indication	Dosing Regimen	Maximum
		Dose
Breast	Initial dose of 840 mg IV, followed by maintenance dose of 420	See
cancer	mg IV every 3 weeks	regimens
	For metastatic disease, Perjeta should be administered as	
	outlined above.	

Indication	Dosing Regimen	Maximum Dose
	For neoadjuvant treatment, Perjeta should be administered for 3-6 cycles. Following surgery, patients should continue to receive Perjeta to complete 1 year of treatment (up to 18 cycles) For adjuvant treatment, Perjeta should be administered for a total of 1 year (up to 18 cycles) or until disease recurrence or unmanageable toxicity.	

#### V. Product Availability

Single-dose vial for injection: 420 mg/14 mL

#### **Coding Implications**

Codes referenced in this clinical policy are for informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

HCPCS	Description
Codes	
J9306	Injection, pertuzumab, 1 mg

Reviews, Revisions, and Approvals	Date
2Q 2018 annual review: summarized NCCN and FDA approved uses for	04/2018
improved clarity; added specialist involvement in care; references reviewed	
and updated.	
2Q 2019 annual review: added appendices/dosage and administration	04/2019
information/product availability; references reviewed and updated.	
2Q 2020 annual review: added NCCN compendium-supported use of	04/2020
colorectal cancer; references reviewed and updated.	
2Q 2021 annual review: added requirement for BRAF wild-type disease for	04/2021
off-label indication of colorectal cancer per NCCN; added NCCN	

Reviews, Revisions, and Approvals	Date
compendium-supported indication of salivary gland tumors and combined	
with colorectal cancer criteria; references reviewed and updated.	
2Q 2022 annual review: references reviewed and updated.	04/2022
Revised criteria to clarify pertuzumab must be prescribed with trastuzumab	01/2023
and docetaxel or chemotherapy per request from PA Ops. For colorectal	
cancer, removed requirement for no previous use of a HER2 inhibitor	
therapy.	
2Q 2023 annual review: for breast cancer, revised docetaxel to taxane-	04/2023
containing chemotherapy per NCCN 2A recommendation; added unresectable	
or metastatic HER2-positive gallbladder cancer and cholangiocarcinoma to	
NCCN recommended uses (off-label); references reviewed and updated.	
2Q 2024 annual review: for gallbladder cancer and cholangiocarcinoma,	04/2024
added option for treatment with resected gross residual (R2) disease; residual	
(R) tumor classification added to Appendix D; references reviewed and	
updated.
